

# M-era.Net

## ERA-NET FOR MATERIALS RESEARCH AND INNOVATION

- ERA-NET for materials research and innovation, including international cooperation
- Network of more than 40 funding organisations from countries and regions in Europe and beyond

### M-ERA.NET Objectives

- Increasing the coordination of European research programmes and public funding in materials research and innovation including materials for low carbon energy technologies and related production technologies
- Strengthen the European RTD community and economy in materials research and innovation
- Implementation of a joint work programme for transnational research cooperation with national and regional public funding
- Joint calls for transnational RTD proposals
- Generation and exploitation of knowledge along the whole innovation chain from basic research to applied research and innovation
- International cooperation with funding organisations from outside Europe
